SPECIAL SUGGESTIONS FOR NOVEMBER

Fall planting time is now here and I am pleased to state that this season I have a stock of choice trees.

Many prefer fall planting and report splendid results with trees planted at this time, as planting now allows the dirt to get well settled around the roots during the winter, giving tree chance for early start in the spring.

Every tree planter should plant nut trees, as they serve the two-fold purpose of producing food and shade, they are ornamental and make a splendid lawn as well as an orchard tree.

Most nurseries have advanced their prices, while mine, listed below, are the same as in catalog previously sent you. If you do not now have that copy let me know and another will be sent.

Fall shipping usually continues until the middle, or latter part of December, depending on the weather, though November shipments are advised.
